

ATUL BAHUGUNA

+91-7982561426 | atul.bahuguna100@gmail.com | linkedin.com/in/atul-bahuguna | github.com/atul-bahuguna

TECHNICAL SKILLS

Programming Languages: Python, C++

Cloud & DevOps: Microsoft Azure (Azure Functions, Azure Document Intelligence, Azure AI Services), ARM Templates, Docker, CI/CD Pipelines, Azure Cognitive Services, Azure OpenAI

AI & ML Frameworks: Generative AI, Prompt Engineering, LangChain, Agentic AI, Microsoft Agent Framework (Multi-Agent Orchestration), RAG (Retrieval-Augmented Generation), Vector Search & Fast Retrieval, Model Fine-tuning & Deployment

Other Technologies: OOP, Power Platform, Linux, Microsoft Teams Integration, Real-Time Voice AI (RTMT), Speaker Diarization, Regex Content Filtering, Meeting Intelligence & MOM Generation

PROFESSIONAL EXPERIENCE

Delphi Consulting

December 2025 – Present

Consultant – Data Scientist / Healthcare AI · UAE Client

Remote

- Serving one of the UAE's leading healthcare organizations, architected a multi-agent AI system using Microsoft Agent Framework, enabling autonomous task orchestration, real-time decision-making, and seamless collaboration across enterprise workflows, reducing manual coordination effort by 50%.
- Engineered end-to-end Agentic RAG and OCR pipelines for intelligent document processing, integrating fast vector retrieval mechanisms that reduced query latency by 40% and improved answer accuracy at scale.
- Implemented Real-Time Meeting Transcription (RTMT) with regex-based content filtering to sanitize and maintain coherent meeting context throughout live sessions, ensuring clean and structured transcripts for downstream AI processing.
- Introduced speaker diarization to automatically identify and attribute spoken content to individual participants in real time, achieving accurate per-speaker tracking across multi-participant meetings with 90%+ attribution accuracy.
- Delivered a suite of agentic meeting tools — auto-triggered MOM generation at meeting conclusion, real-time summarization, and action item extraction — reducing post-meeting documentation time by 65%.
- Integrated AI voice agents with Microsoft Teams enabling users to interact via natural real-time voice conversations: issuing commands, assigning tasks, querying knowledge bases, and triggering multi-step workflows entirely hands-free.
- Shipped accelerated internal applications to automate repetitive business workflows, reducing manual processing effort by 35% and improving team throughput in a fast-paced delivery environment.
- Led a cross-functional team of 4 professionals, mentoring and onboarding 2 junior engineers through structured coaching, code reviews, and knowledge transfer, cutting ramp-up time by 30%.
- Established technical standards for agent design, RAG pipeline architecture, RTMT integration, and Teams bot deployment, ensuring all solutions met enterprise security, compliance, and scalability requirements.

MAQ Software

April 2024 – November 2025

Software Engineer I

Noida, India

- Spearheaded a Generative AI initiative for extracting entities, stamps, and signatures from large-scale documents; optimized prompt engineering and fine-tuned GPT-4 models, achieving a 40% improvement in AI extraction accuracy.
- Configured and deployed a semantic search index to enhance AI-powered retrieval capabilities; fine-tuned models to map between text and images (stamps, signatures) and convert content across multiple languages.
- Built custom containerized applications in Azure Function Apps using Docker images, eliminating OS-level vulnerabilities; provisioned infrastructure via ARM templates for automated governance.
- Designed and implemented a legal comparison system that collates AI-extracted data against real-life cases to deliver evidence-based recommendations, accelerating legal research speed by 45%.
- Applied GDPR-compliant AI data extraction with automated PII removal and retry mechanisms, ensuring encrypted documents were excluded while delivering accurate, regulation-aligned results.
- Managed large-scale API integrations and data pipelines, achieving a 25% improvement in data processing efficiency while establishing best practices for AI model deployment, security, and governance.

- Contributed to Generative AI initiatives including intelligent document analysis tools using Azure AI Services and LLM-driven solutions for extracting and categorizing data from semi-structured documents.
- Collaborated on building downstream analytics pipelines and attended advanced workshops on cloud-based AI, enhancing core technical skills by 25% and contributing to internal proof-of-concept projects.

KEY PROJECTS

- **Real-Time Meeting Intelligence Platform (Delphi Consulting · UAE Healthcare Client):** Architected a full-stack meeting AI system on Microsoft Teams featuring RTMT-based live transcription, regex content filtering for context integrity, speaker diarization for participant attribution, and a suite of agentic tools — including auto-triggered MOM generation, real-time summarization, and action item extraction — all driven by multi-agent orchestration via Microsoft Agent Framework with real-time voice interaction.
- **GenAI Entity Extraction System (MAQ Software):** Spearheaded a Generative AI solution for extracting entities from documents, achieving 40% accuracy improvement. Implemented containerized Azure Functions, GDPR-compliant comparison system accelerating research by 45%, and improved data processing efficiency by 25%.
- **Customer Report Card:** Engineered a customer-focused reporting solution with dynamic parameter scaling, Row-Level Security (RLS), custom DAX measures in Power BI semantic layer, and automated scheduling — reducing report generation time by 70%.
- **Image Completion with Deep Learning:** Developed neural network solution using auto-encoders to predict missing image portions and remove blur; implemented and optimized custom architectures in TensorFlow, PyTorch, and Keras for contextually accurate image completion.

EDUCATION

Bachelor of Technology in Computer Science 2019 – 2023
Graphic Era Hill University, Dehradun, Uttarakhand | CGPA: 83.33%

ACHIEVEMENTS & CERTIFICATIONS

- Certified in Advanced Data Structures and Algorithms with C++.
- Ranked Knight on LeetCode with a 2000+ rating, placing in the top 3% globally (Handle: WhyAlwaysMe).
- Secured Global Rank 13 on CodeCheck programming contest, competing against thousands of participants worldwide.
- Attained Specialist rank on Codeforces with a rating exceeding 1590 (Handle: WowCoder).
